CENSORSHIPGATE:

Complex Criminal Government Scheme Blown Wide Open, Conspirators Exposed and In Shocking Detail.

Subscribe

What you are about to read is a truly stunning exposé of the Public-Private Partnerships between the U.S. Federal Government, Big Tech and various NGOs, both foreign and domestic, which have unlawfully conspired to systematically censor the American people in the most partisan manner.

In order to fully comprehend the sheer breadth and depth of this global criminal enterprise, it's crucial to understand the part that Google was set up to play. As follows:

Google has proven — over and over again — that it is the draconian censorship arm of the rapidly emerging tyrannical technocracy sometimes called the **Global Control Matrix**. This particular technocratic entity is at once totalitarian in its operation, criminal in its intent and rabidly anti-truth. In a phrase, the enterprise known worldwide as **Google** is not only dangerous to the extreme but a menace to the entire planetary civilization.

History and back story

Google is a *Big Brother* creation of DARPA's information technology laboratories now run under the rubric of the Central Intelligence Agency in close coordination with the NSA and DIA. The following two links reveal the hidden back story.

From its very inception, **Google** was fabricated as a global censorship platform whose primary mission is to filter out the truth whenever it poses a threat to the establishment and/or the power elite.

Google is the plaything of *The Powers That Be* and ruthlessly used to disappear truth in all spheres of life.

The two greatest areas of threat to the status quo concern real conspiracy theories and health truth. This is where **Google** has intensified its efforts to remove all content that presents facts about such radioactive topics as the false flag 9/11 terrorist attacks, COVID-19 bioweapon and the weaponized super-vaccination agenda.

N.B. This exposé was submitted to SOTN by Sayer Ji, founder of GreenMedInfo.com, who was recently added along with Robert F. Kennedy, Jr., as a plaintiff to the America First Legal lawsuit referenced below. They were both included on a list of long-time vaccine truth-tellers known as the **“Disinformation Dozen”** as a means of denigrating their reputations and intimidating them into a cease and desist mode.

America First Legal Obtains New Internal CDC Documents Revealing Foreign Collusion in Biden-Harris Government

GMI Reporter | aflegal.org

Shocking details emerge that connect the dots between foreign entities, the Biden-Harris government, and big tech and their attempts to control speech

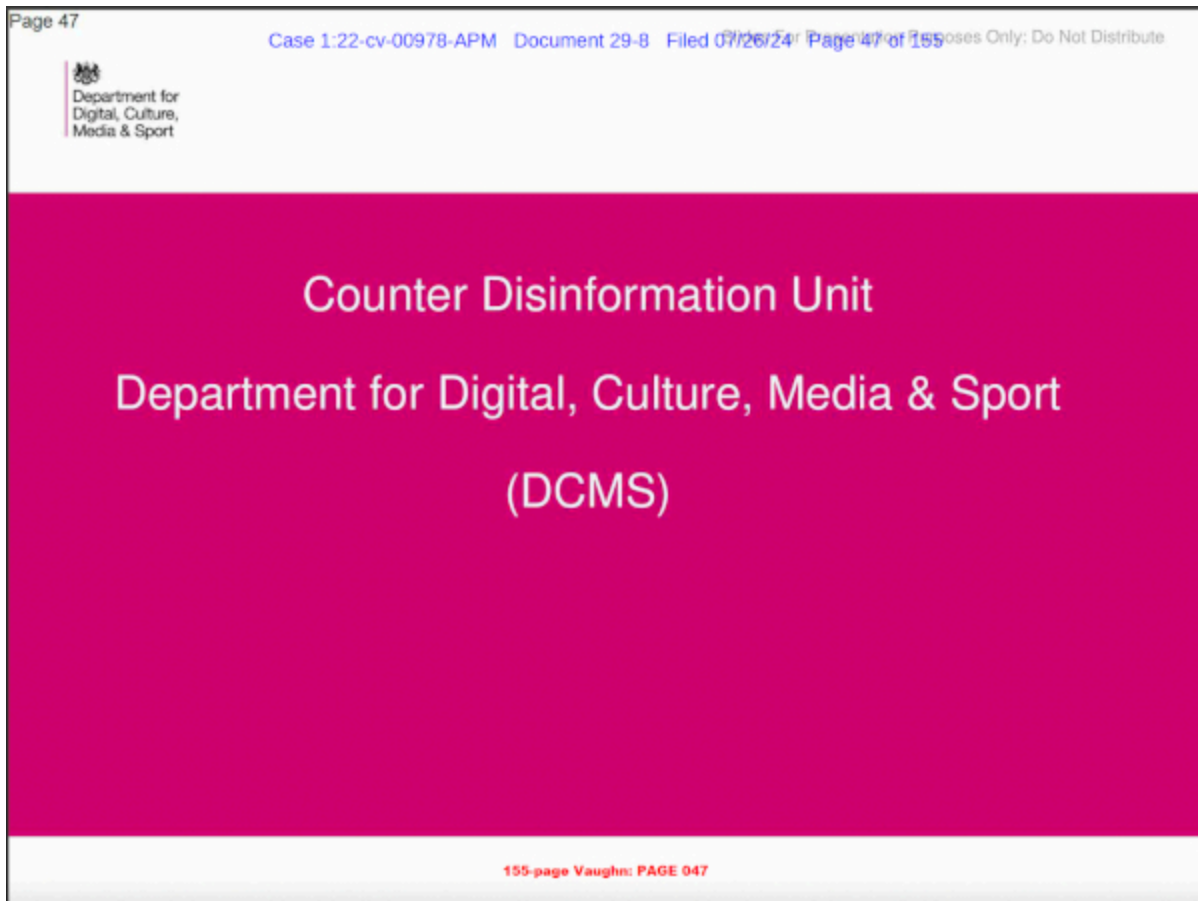

WASHINGTON, D.C. – Today, America First Legal released new documents exclusively obtained in its **litigation** against the Centers for Disease Control and Prevention (CDC). AFL obtained the slide deck used in a presentation by the United Kingdom’s “Counter Disinformation Unit,” to the Biden-Harris National Security Council (NSC) Interagency Policy Committee (IPC) on August 10, 2021. This release comes on the heels of **calls** from House Cybersecurity Subcommittee Chairwoman, Nancy Mace, to ensure that the 2024 election is protected from the deep state censorship that was prevalent in the 2020 election.

As a part of the NSC’s regular interagency meetings on censoring COVID-related speech in the United States, the White House hosted the Counter Disinformation Unit (CDU) from the U.K. government in 2021 to learn about their most effective censorship techniques. Some of the UK’s recommendations to the Biden-Harris Administration included:

- Establishing a dedicated unit to lead government-wide censorship efforts;
- Enacting legislation for the government to regulate the misinformation and disinformation policies of tech companies, and punish them if they refuse to comply

with government censorship demands;

- Create and maintain partnerships with companies to “flag” disfavored content;
- Use the foreign policy apparatus to coordinate this shared agenda between aligned governments and multilateral institutions;
- Leverage its control over social media to “counter disinformation” and promote leftist dogma

This meeting was attended by high-level staff from the White House, the NSC, the Office of the Director of National Intelligence (ODNI), the Central Intelligence Agency (CIA), the Federal Bureau of Investigation (FBI), the Departments of State, Treasury, Defense (DOD), Homeland Security (DHS), and Health and Human Services (HHS), the U.S. Agencies for International Development (USAID) and Global Media (USAGM), as well as high-ranking officers in the Army, Navy, and Air Force.

At this meeting, the CDU outlined how they have been censoring the British public, and these documents expose how left-wing authoritarian governments across the globe are working together to attack free speech.

During the censorship meeting, the Biden-Harris NSC invited the British government to share its censorship playbook. They recommended creating a dedicated hub to lead government-wide censorship efforts, passing legislation to enable the government to coerce social media companies, and enlisting the Department of State to partner with foreign allies and multilateral institutions to coordinate the global censorship agenda.

1. A centralized hub to lead government-wide censorship efforts

The Counter Disinformation Unit (CDU) is a British “cross-departmental” body that coordinates censorship programs across the whole of the British government. They “support formulation of a coordinated Government response” to the “threat” of misinformation (anything the government deems false).

Page 49

Page 49 of 155

Cross-Departmental Counter-Disinformation Unit

Slides For Presentation Purposes Only: Do Not Distribute

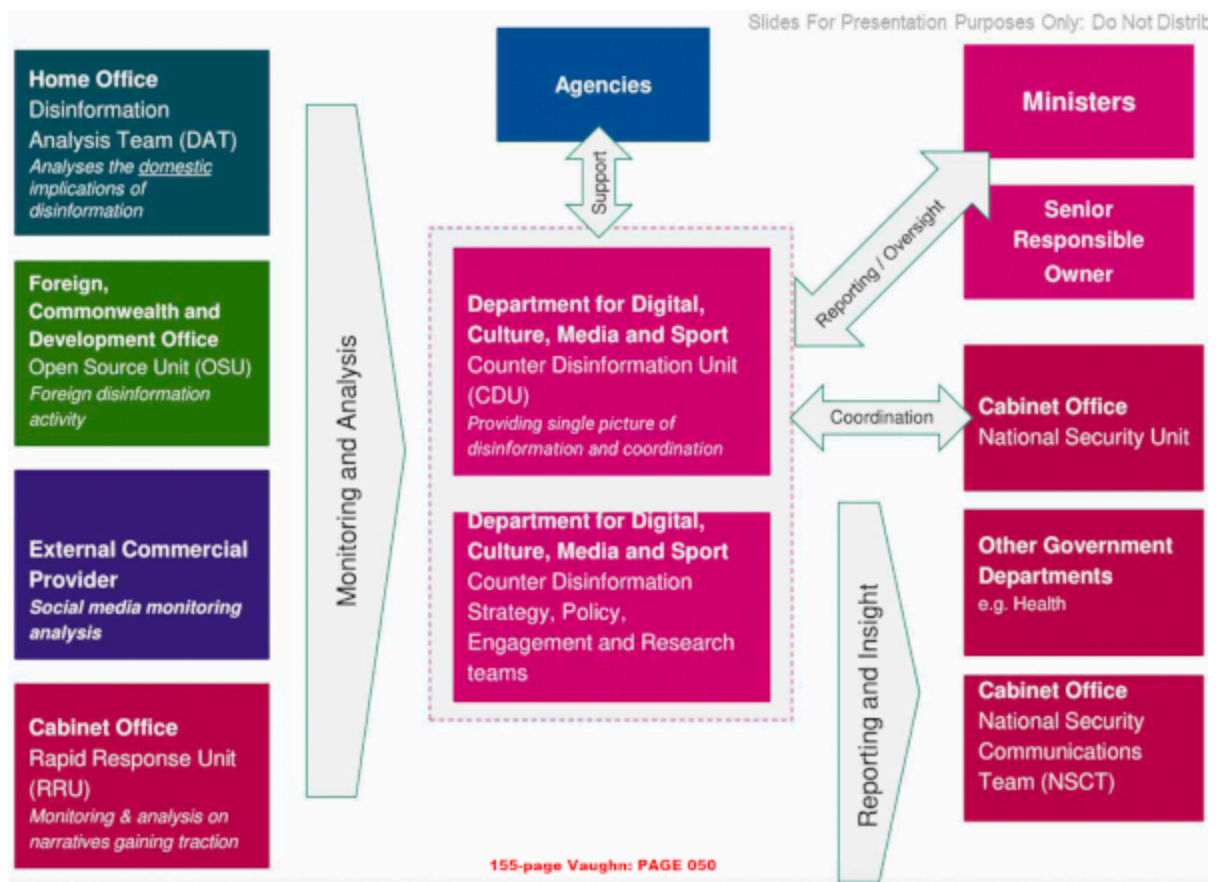

The DCMS led-Counter Disinformation Unit works across Departmental boundaries and is mandated to provide the most **comprehensive picture possible about the extent, scope and impact** of disinformation during times of heightened risk by **bringing all the relevant information into one place**.

We've previously stood up an operational response to counter disinformation during the 2019 European elections, the 2019 UK General Election, and the local and devolved UK elections in May of this year.

We've been stood up since March last year in response to Covid-19.

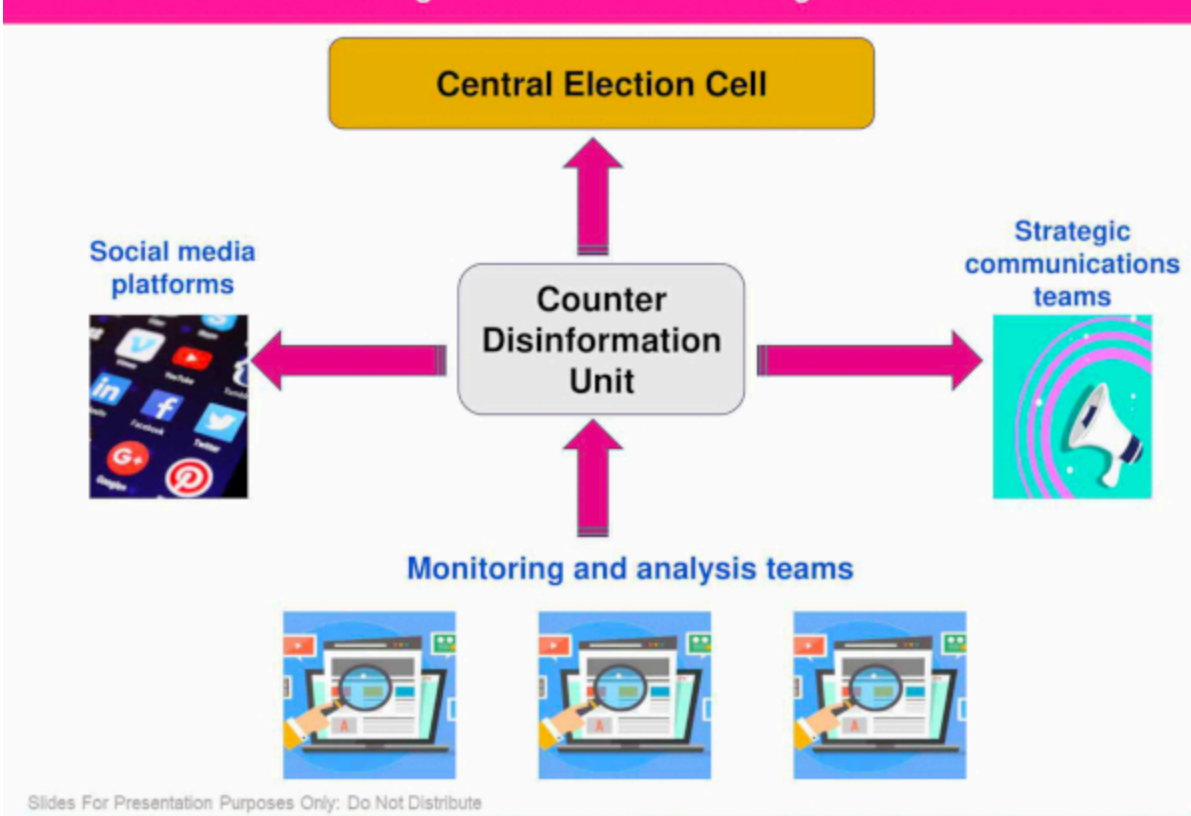

The CDU coordinates the British censorship program with private companies such as social media platforms and non-profits. The CDU includes components of the U.K.'s foreign policy apparatus, domestic and foreign intelligence services, and individuals working directly for the Prime Minister in the Cabinet Office's National Security Unit.

- Projects support partner governments, media organisations, civil society to promote independent media, collect open-source information and, where appropriate, to expose disinformation.

Separate AFL litigation uncovered that the Biden-Harris Administration convened similar public-private censorship partnerships in the U.S. well into 2024. For example, AFL succeeded in dissolving the Orwellian Homeland Intelligence Experts Group in litigation that labeled Trump supporters as “Domestic Terrorism Threats.”

Around election time, the CDU stood up a “Central Election Cell” to kick censorship efforts into overdrive.

During the U.S. 2022 Midterm elections, the Biden-Harris Administration similarly set up a National Election Command Post within the FBI.

2. Enacting censorship laws

In the meeting, the CDU shared how their proposal would allow them to directly coerce social media platforms to ensure that the government's censorship demands were followed. By creating a new duty of care, the proposed legislation empowers a British regulatory agency to demand the censorship of content that the U.K. government deems harmful. The U.K. Online Safety Act came into force in October of 2023 and is the basis under which U.K. law enforcement officials have threatened to extradite and jail U.S. citizens. The law parallels recently resurfaced comments made by then Senator Kamala Harris in 2019, which called for the DOJ to punish social media companies that allowed "disinformation" and "misinformation."

- The Online Safety regulatory framework includes a new legal duty of care on companies, which will be enforced by the appointed regulator, Ofcom.
- The duty of care will require companies to address harms to individuals on their online platforms, including misinformation and disinformation.

Category 1 Services

- Services with the largest audiences and a range of high risk features (known as 'Category 1 services'), including the **major social media platforms, will be required to set out what content**, including many types of misinformation and disinformation that harms individuals, **is and is not acceptable in their terms and conditions.**

Enforcement

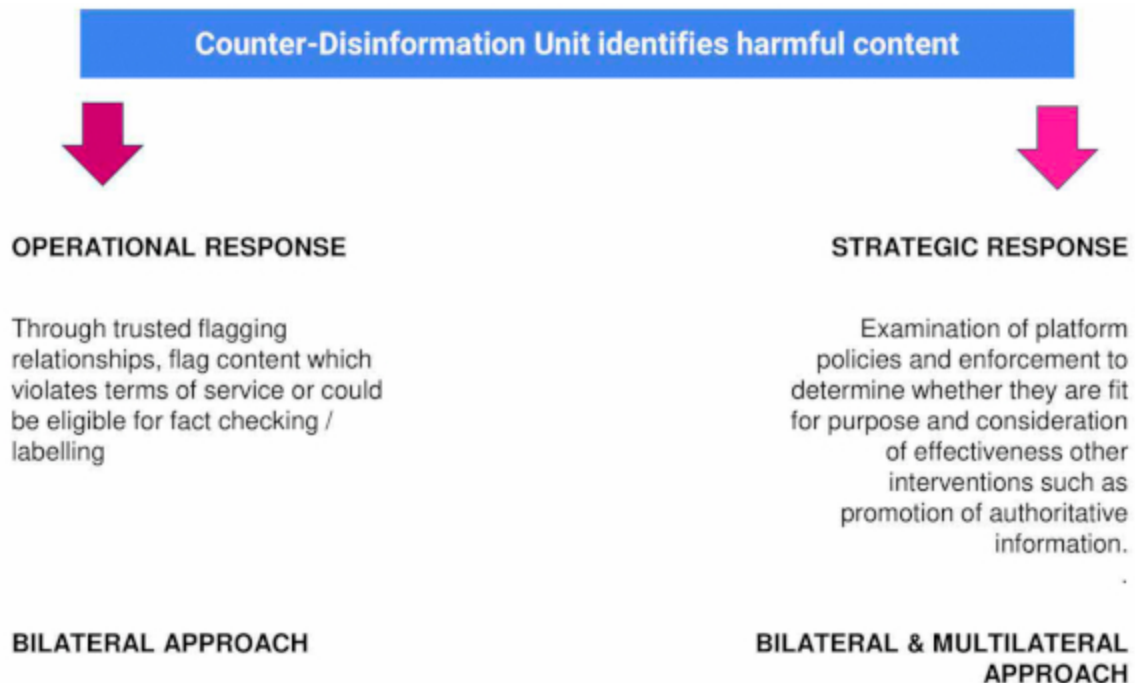

- **Companies will need to enforce this effectively**, including removing content if they've made it clear it is not allowed on the platform. If what is appearing on their platforms doesn't match up with the promises made to users, **Ofcom will be able to take enforcement action.**

A separate AFL investigation has confirmed that the Biden-Harris White House solicited policy recommendations from the British-based Center for Countering Digital Hate (CCDH)–the group behind the U.K. Online Safety Act– and adopted commitments to hold companies accountable through DOJ prosecutions and FTC enforcement actions for allowing “online harassment” on their platforms.

3. **Establish regular lines of communication between government and social media platforms.**

The CDU also relies heavily on “trusted flagging relationships.” Effectively, this means when the government directs social media companies to censor specific posts and individuals. This behavior of flagging posts led AFL to initially file the lawsuit, which

resulted in the production of these documents and is at the heart of the *Missouri v. Biden* case, in which AFL filed two key amicus briefs on behalf of dozens of members in the House of Representatives. Prior releases obtained by AFL in this litigation revealed that the Biden-Harris Administration had also engaged in this sort of “trusted relationship” partnership with social media companies even before this meeting.

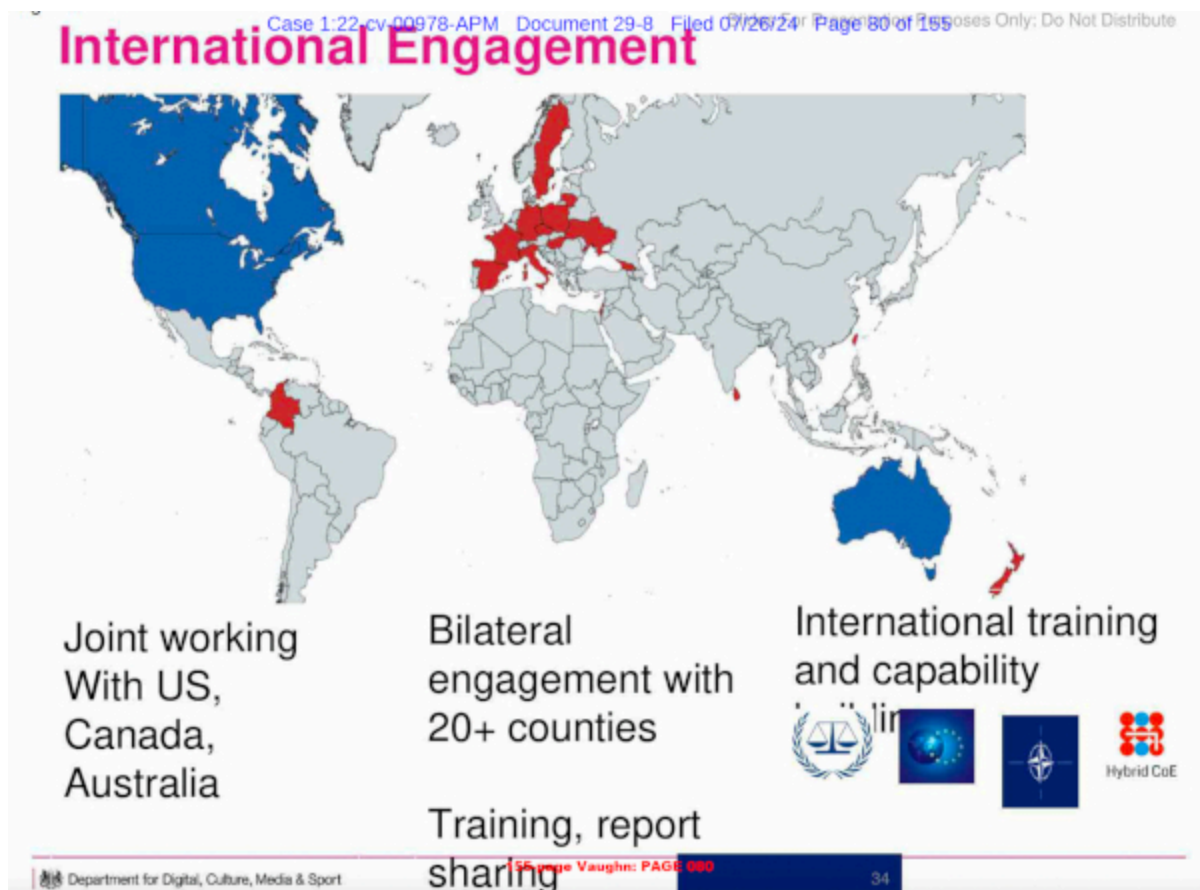

4. International government pressure

The presentation appears to show that the U.K. government engages its foreign policy apparatus to further its censorship agenda and encouraged the U.S. to do the same. One of the so-called “significant benefits” of this approach would be, according to the presentation, that this unified front of government pressure would “encourag[e] cooperation from platforms.”

The U.K. Foreign Office and the U.S. Department of State appear to play important similar roles in this international government censorship partnership. By coordinating across left-wing authoritarian governments, they can manipulate the global population into believing that there is no alternative to massive government censorship of social media, and “industry” would “efficiently implement[] new systems and processes.” In 2021, the U.K. boasted of a close working relationship with the U.S., Australia, and Canada, as well as bilateral relationships with 20 additional countries. This begs the

question: how many nations have come on board with this initiative by now? To explore the depths of these censorship partnerships, AFL recently launched investigations into potential involvement by the Biden-Harris Department of State in heavy-handed retribution against Telegram and X for refusing to censor their platforms.

- There are also significant benefits to collaborating with international partners:
 - Clear message that the international community is prioritising this policy area, encouraging cooperation from platforms.
 - A consistent ask would support industry in efficiently implementing new systems and processes.
- ***So far, encouraging response from international partners. We would be pleased to share the framework with you and arrange a follow-up meeting to discuss this subject further.***

The CDU presentation also highlights the role of multilateral institutions in this international engagement, specifically identifying the G7's Rapid Response Mechanism

and the United Nations Interagency Platform on Culture for Sustainable Development (IPCSD) under the heading: “Multilateral cooperation to counter disinformation.” The logos of the North Atlantic Treaty Organization (NATO), the International Criminal Court (ICC), and the European Center for Excellence of Countering Threats are visible under the heading, “International training and capability.”

INTERNATIONAL ENGAGEMENT

- International engagement with partners to counter disinformation.
 - Sharing ideas and open source intelligence
 - Building coalitions
 - Sharing lessons learned
- Exploring and delivering programmes and joint campaigns
- Multilateral cooperation to counter disinformation
 - IPCSD
 - CFI
 - G7 RRM

5. Promote leftist dogma

Part of the U.K. government’s presentation included a description of a U.K. initiative called the “Counter Disinformation and Media Development Programme,” which was active in Eastern Europe from 2016 to 2021. According to their “Theory of Change,” one of the outcomes of this scheme was that the targeted populations would “reduce identification with pre-existing social biases” and increase “support for gender equality” and “liberal democratic values.” These terms may sound innocuous, but in practice, they are covers for left-wing social re-engineering experiments. For instance, money from the CDMD Programme was used to fund the “Global Disinformation Index,” which runs an “advertising blacklist” for websites that they allege push “anti-trans narratives.”

Counter Disinformation and Media Development Programme

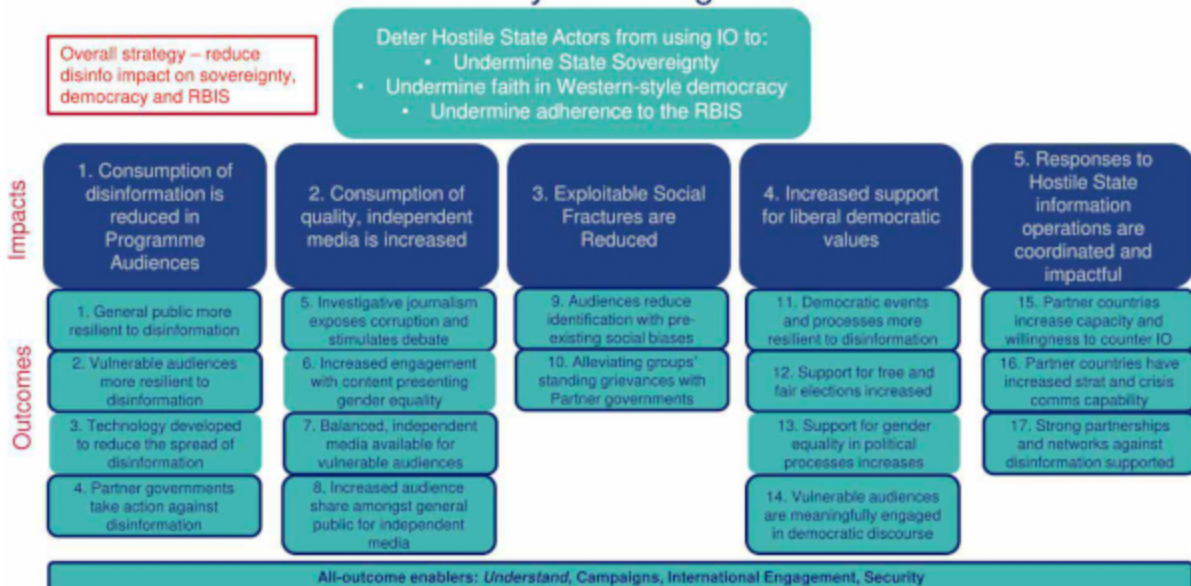

Foreign, Commonwealth
& Development Office

- Launched in 2016.
- FY 2021-22: £29.8m
- Supports NSC Russia Strategy objective to "protect national security by reducing the harm to democracy and the rules-based international order caused by Russia's information operations".
- Supports a whole-of-society approach aimed at changing Russia's cost benefit analysis by
 - Strengthening the Information Environment
 - Increasing Resilience to Disinformation
 - Building a Strong UK and Western Response
- Operates across the Baltic States, Eastern Neighbourhood, Central Europe and the NATO space.
- Projects support partner governments, media organisations, civil society to promote independent media, collect open-source information and, where appropriate, to expose disinformation.

CDMD: Theory of Change Overview

These slides expose the Biden-Harris Administration's cooperation with ideologically aligned leftist allies to push woke progressive dogmas while monitoring and censoring what Americans think and say. America First Legal will keep fighting tirelessly to protect and defend freedom of speech.

Statement from Gene Hamilton, America First Legal Executive Director:

"With no apparent appreciation for the irony that the First Amendment to our Constitution was adopted following our independence from Great Britain, these records show that the Biden-Harris regime apparently engaged with representatives from the United Kingdom on ways to more effectively censor the speech of Americans across the country. The Biden-Harris Administration's desire to silence speech and control what information Americans are able to obtain is so extreme, so pervasive, and so over-the-top that they are willing to listen to foreign governments explain ways to better violate core constitutional rights of the American people. Freedom of speech is essential to the success of our democratic republic, and for the continued betterment of humanity. We will continue to expose those who oppose free speech, and will continue to fight for the rights of all Americans," said Gene Hamilton.
